

“Wet Turn Assurance Warranty”

Valuepart offers authorized dealers the following “3 Year/4000 hour, Wet Turn Assurance Warranty” on sealed and lubricated track chains purchased from Valuepart. Valuepart guarantees against joint leakage from defects in material or workmanship, under normal use, for a period of 36 months or 4000 service hours, whichever comes first. If at the time, the authorized (selling) dealer performs a “Wet Pin and Bushing Turn”, as part of normal routine maintenance and the servicing dealer discovers a damaged pin and bushing assembly due to a premature loss of lubrication. Valuepart will provide the necessary replacement pins, bushings, seals, thrust rings, or track links, free of charge to the participating dealer. Warranty of premature dry joints on lubricated chain is limited to the value of the failed parts replaced, not to exceed in total the current replacement cost for the appropriate Valuepart SALT pin and bushing group(s).

Tracks with wide shoes have the normal warranty credit reduced by 50%. Track type log skidders and Sealed and Greased track chains are not eligible for the Wet Turn Assurance Warranty. Transportation costs & labor are not cover by this warranty.

Items not covered by the Warranty:

Any external damage occurring to the Links, Bushings, Rail assemblies which result in the loss of adequate lubrication of the pin and bushing, extreme or abusive service conditions, excessive track pad widths, or lack of routine, accepted maintenance procedures will immediately void this warranty. For additional information on any exclusion to this warranty contact the Valuepart branch nearest you.

Labor charges related to the pin and bushing service, are considered normal maintenance, and is the responsibility of the owner/operator/user.

Valuepart inc. reserves the right to discontinue this special warranty at any time for any reason.
