

VALUEPART INC.

VTRACK by Passini Brand Undercarriage Now Available For Caterpillar™ D10 and D11 Models

August 3rd, 2015 – Vernon Hills, Illinois. Valuepart Inc. today announced the availability of VTRACK by Passini brand undercarriage sets and individual components for all models of Caterpillar™ brand D10 and D11 heavy bulldozers. Thousands of these tracked machines are in use in North American mining, quarry, and aggregate moving applications.

The distinctive high-drive design and high power output of these models is known to be particularly hard on undercarriage components. Starting with system performance in mind, the VTRACK by Passini system was designed to meet the rigorous demands of the applications where the D10 and D11 thrive. For example, the rollers included as part of this application were designed and manufactured by Valuepart’s VIP production group from the ground-up with longevity and temperature control in mind.

“Valuepart’s move into VTRACK by Passini undercarriage on the largest Caterpillar™ applications was prompted by requests from our aftermarket dealer network” said Andrea Passini, Valuepart’s Global marketing leader, “With the addition of complete D10 / D11 undercarriages, the application coverage offered by the VTRACK by Passini brand is the broadest in the Global aftermarket.”

For pricing and availability of VTRACK by Passini application coverage on Caterpillar™ D10 and D11 heavy bulldozers, please contact your Valuepart sales representative or nearest Valuepart location.
